Select point

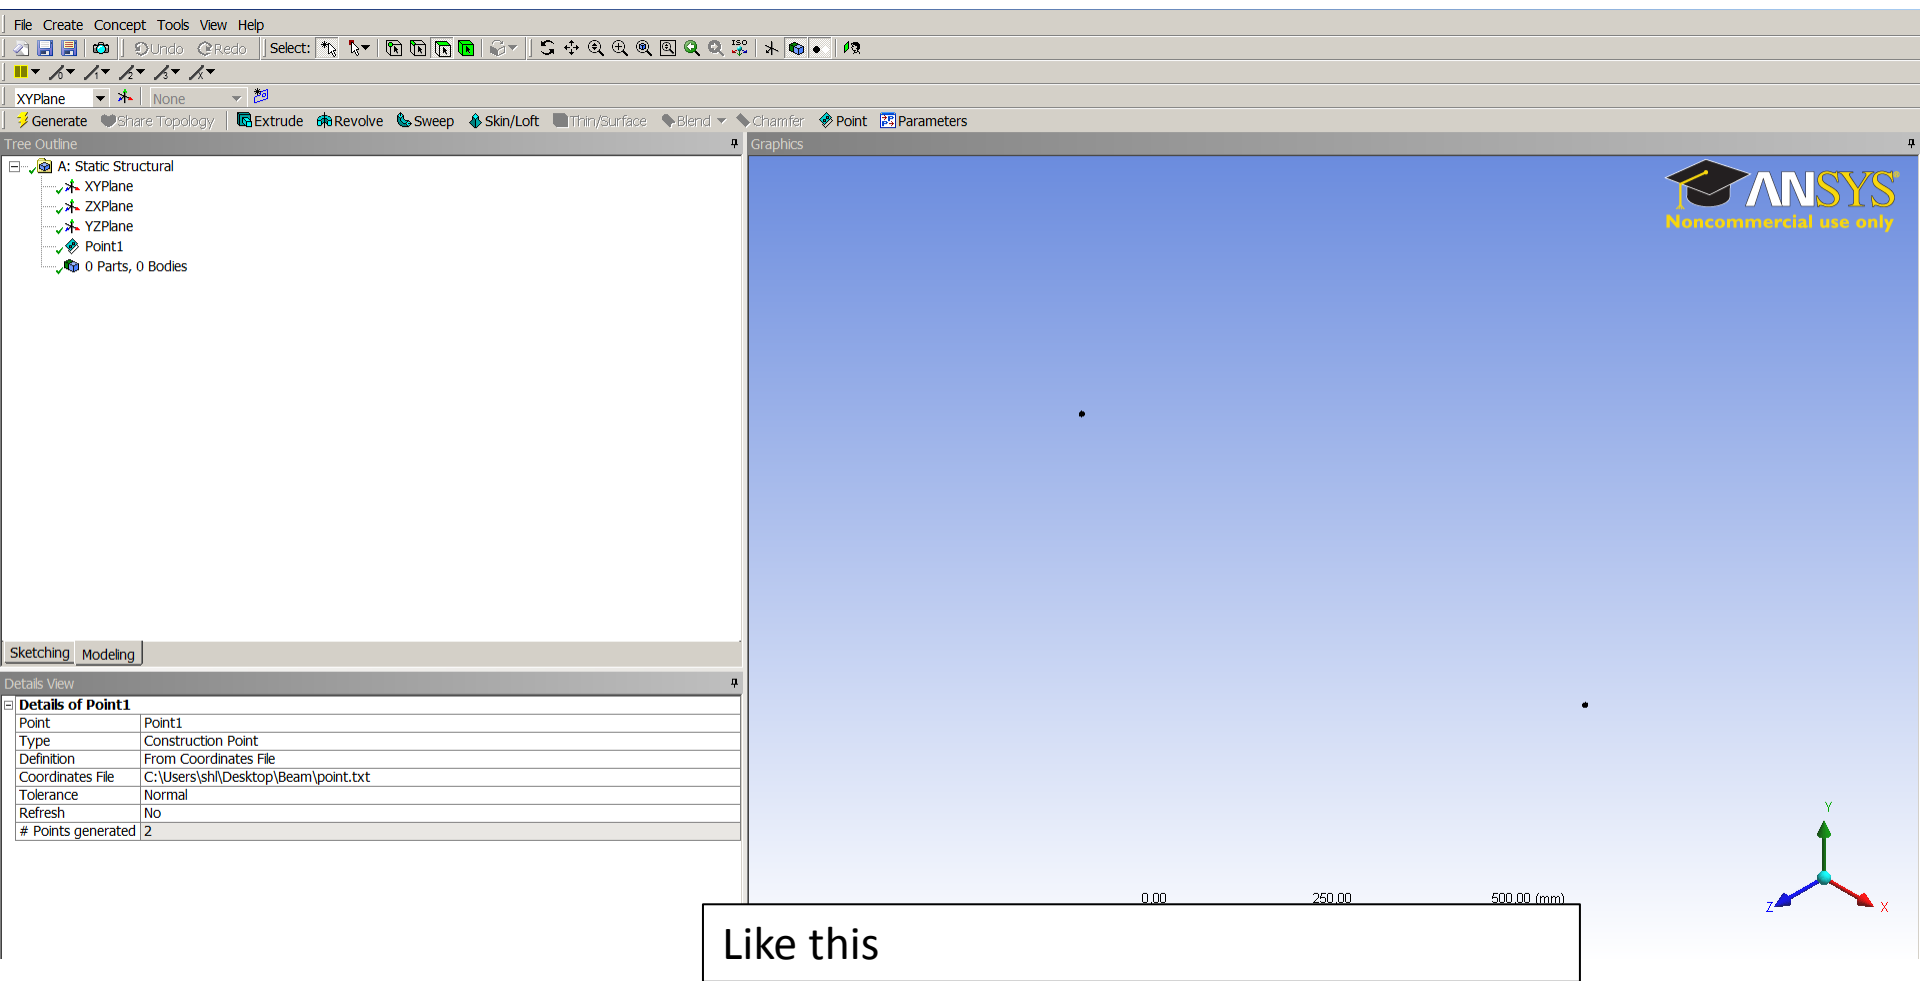

Select Manual input or From coordinates file.

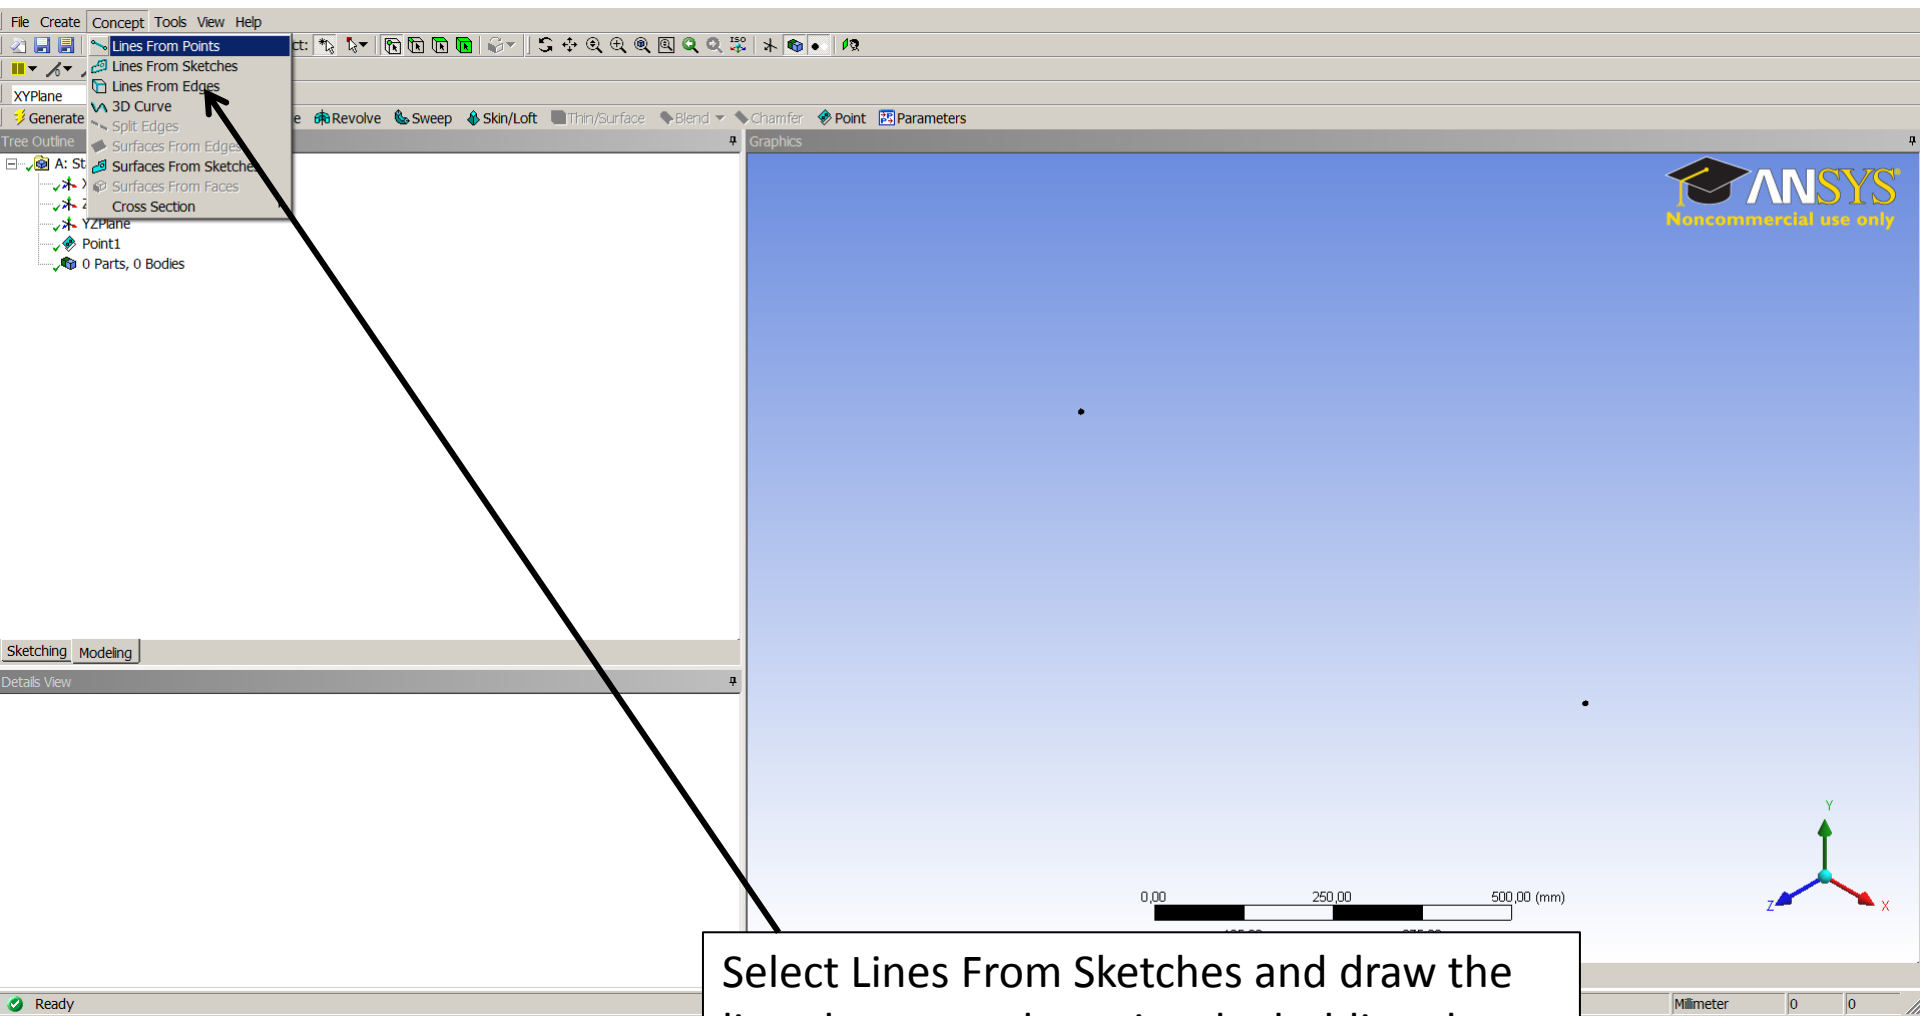

You can make the file in notepad like this.

```
point - Notesblok
File Rediger Formater Vis Hjælp
1 1 0 0 0
1 2 1000 0 0
```

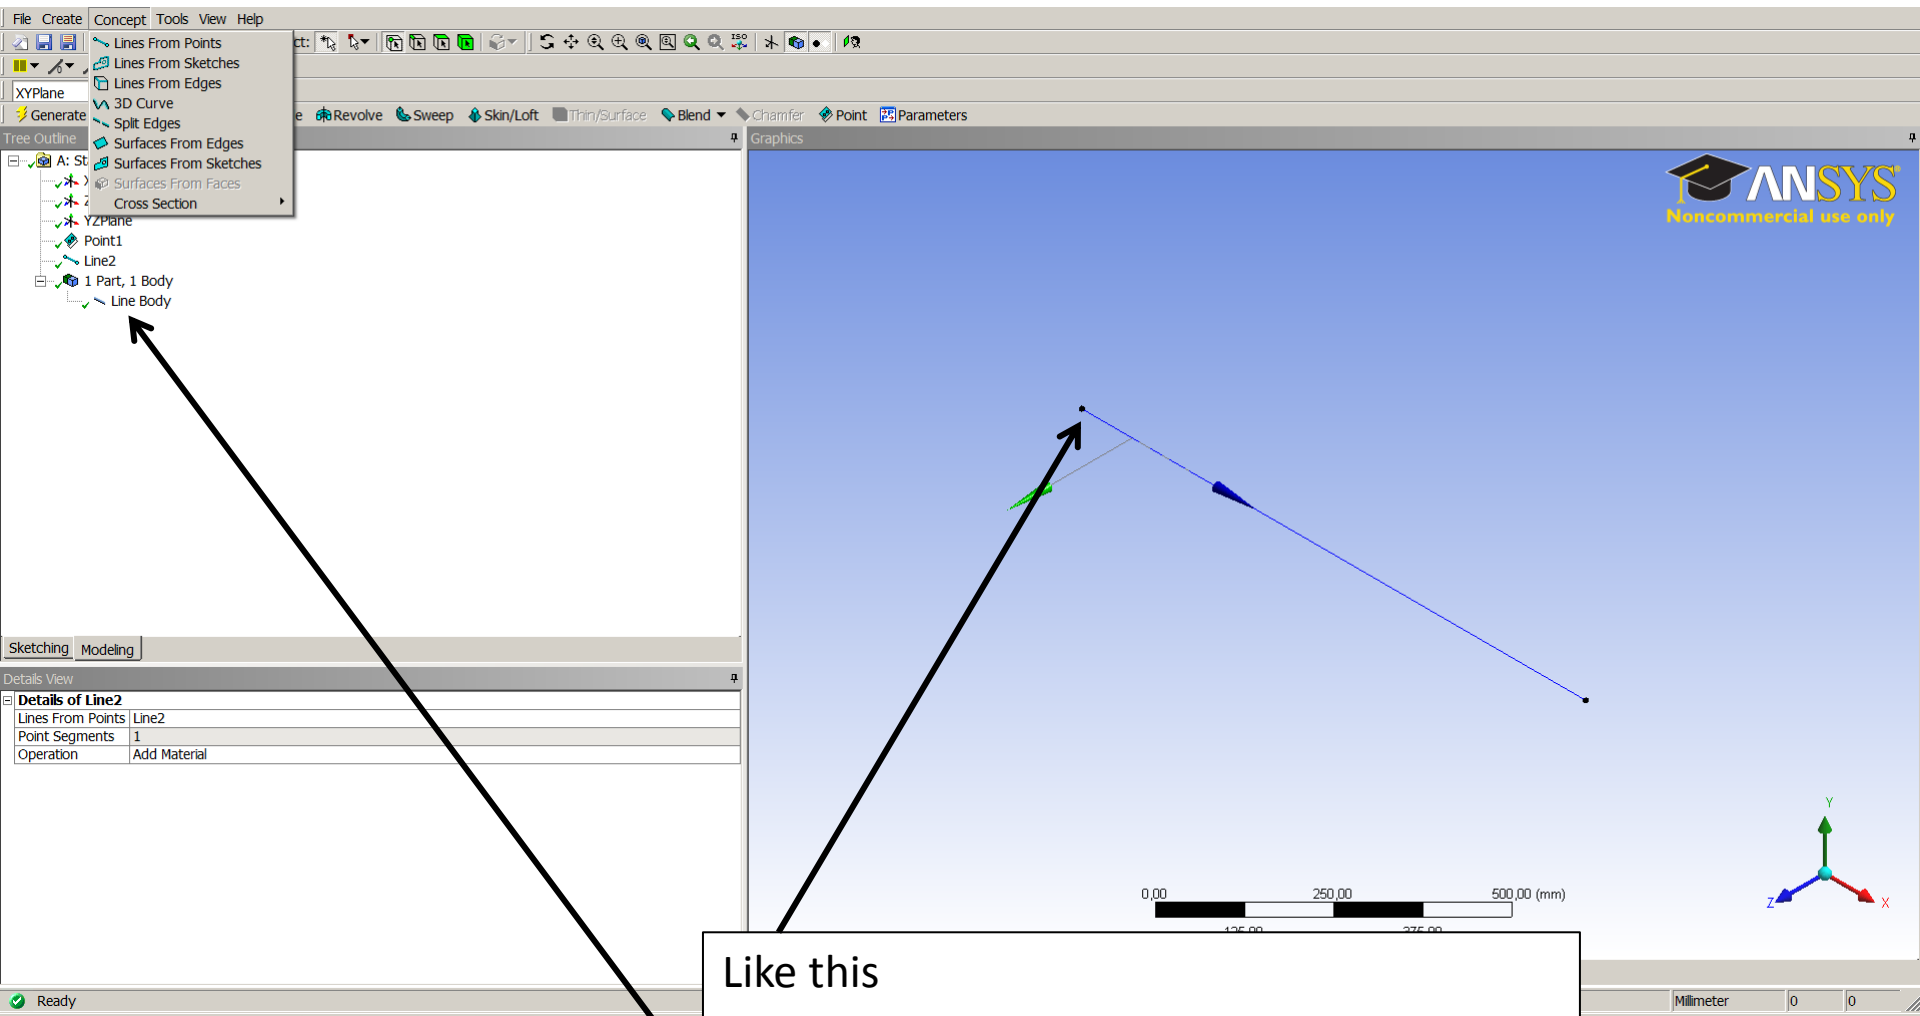

Where:  
(Keypoint) (Grup number) (x) (y) (z)

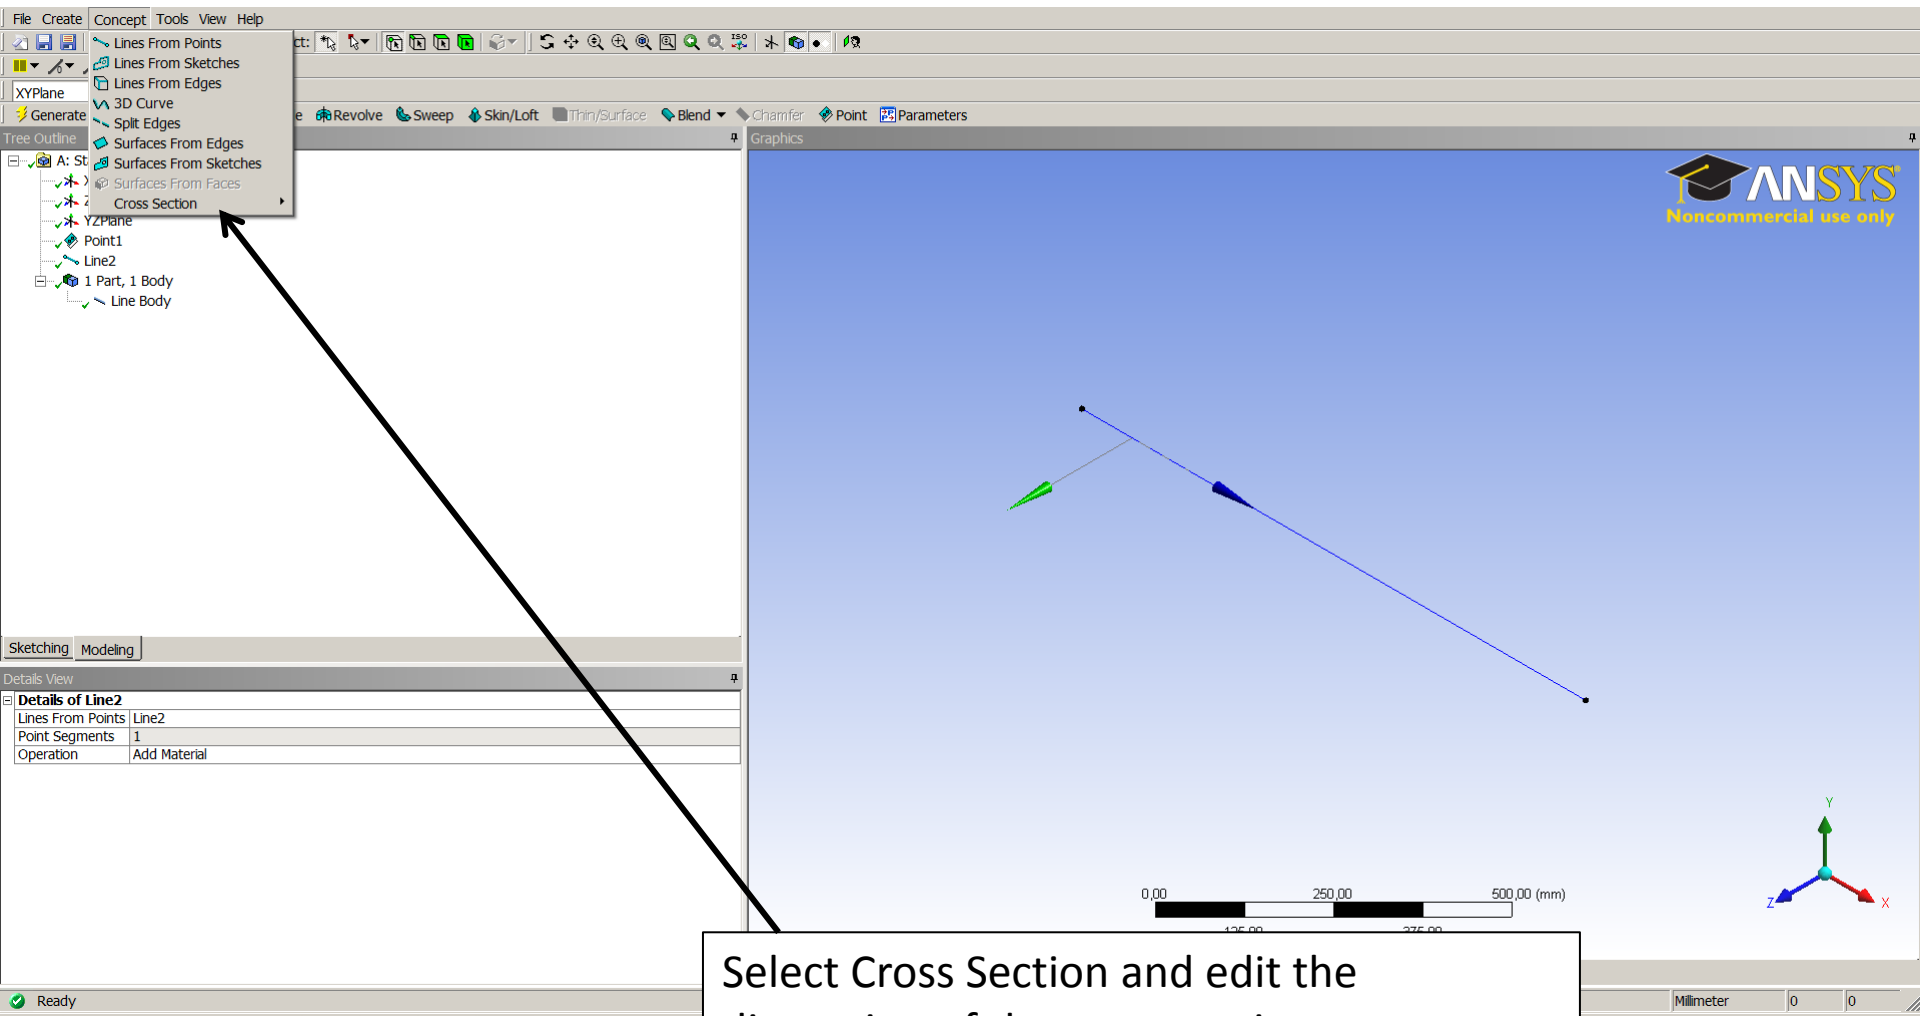

Like this

Select Lines From Sketches and draw the lines between the points by holding the Ctrl bottom on the keyboard and use the mouse.

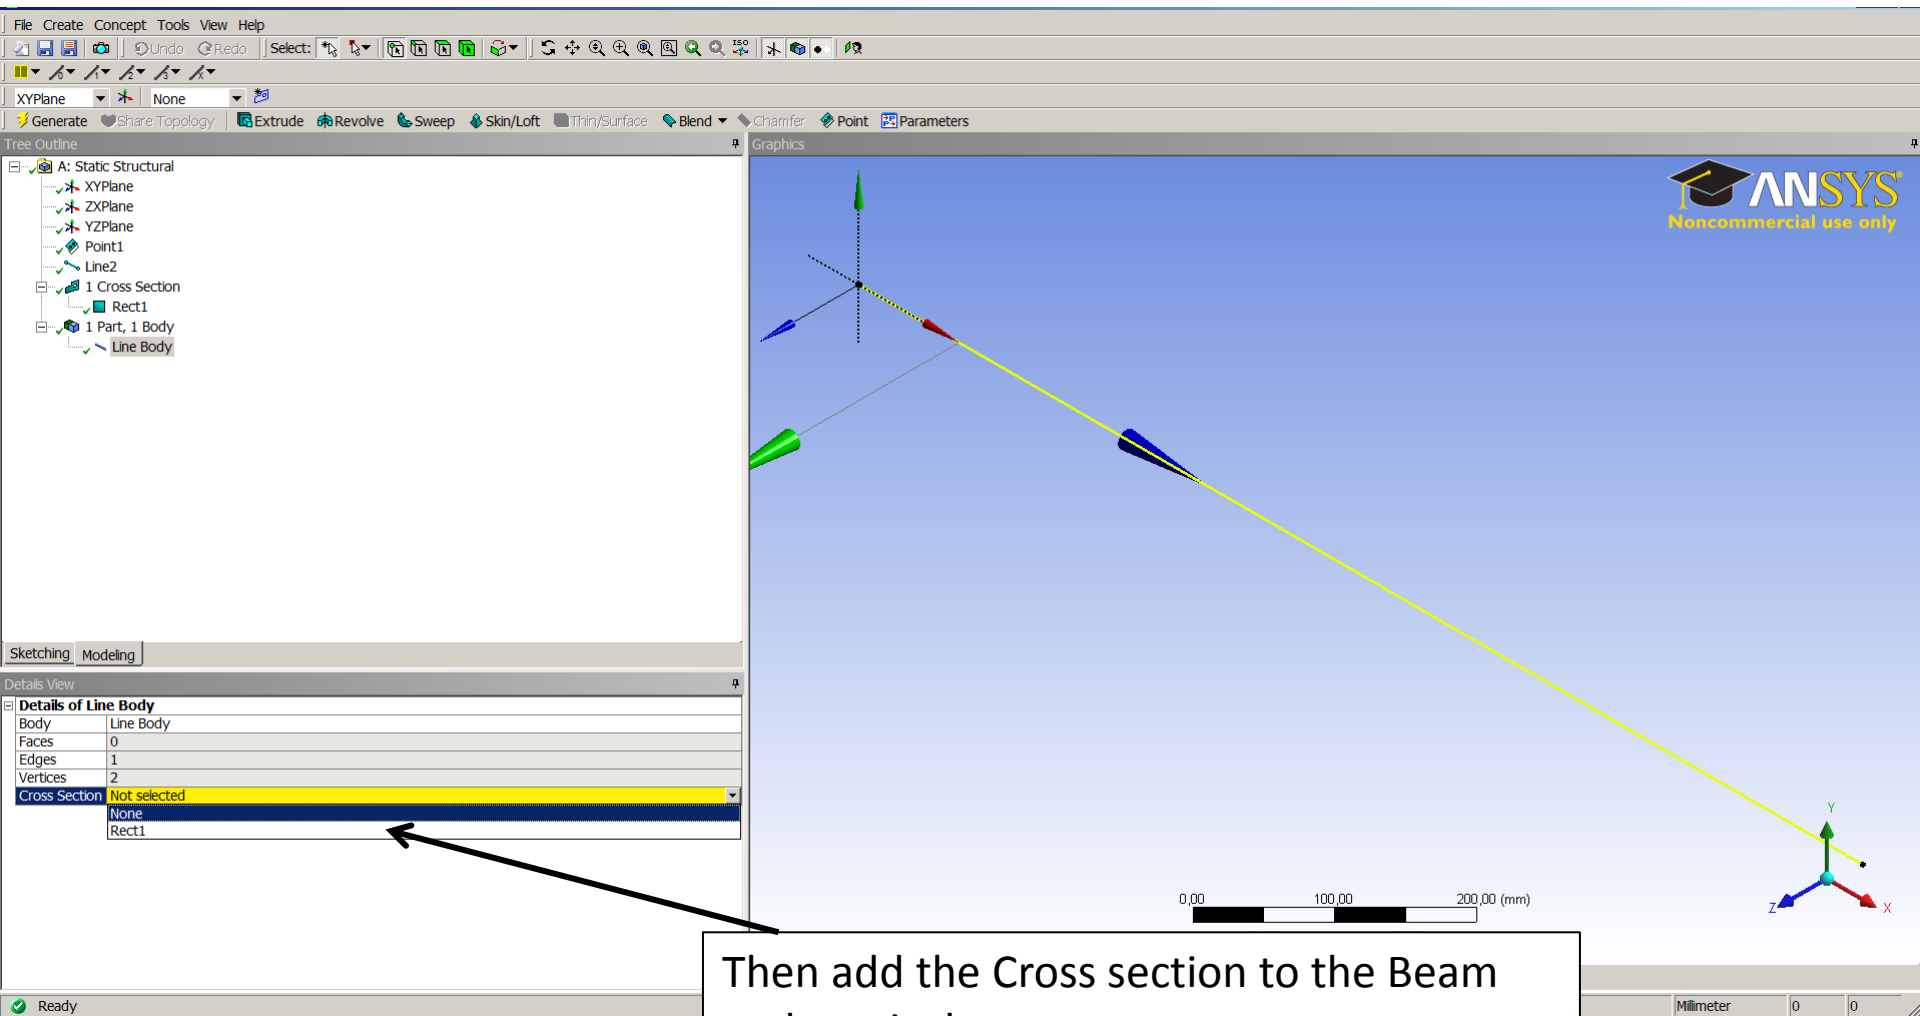

Like this  
Line body

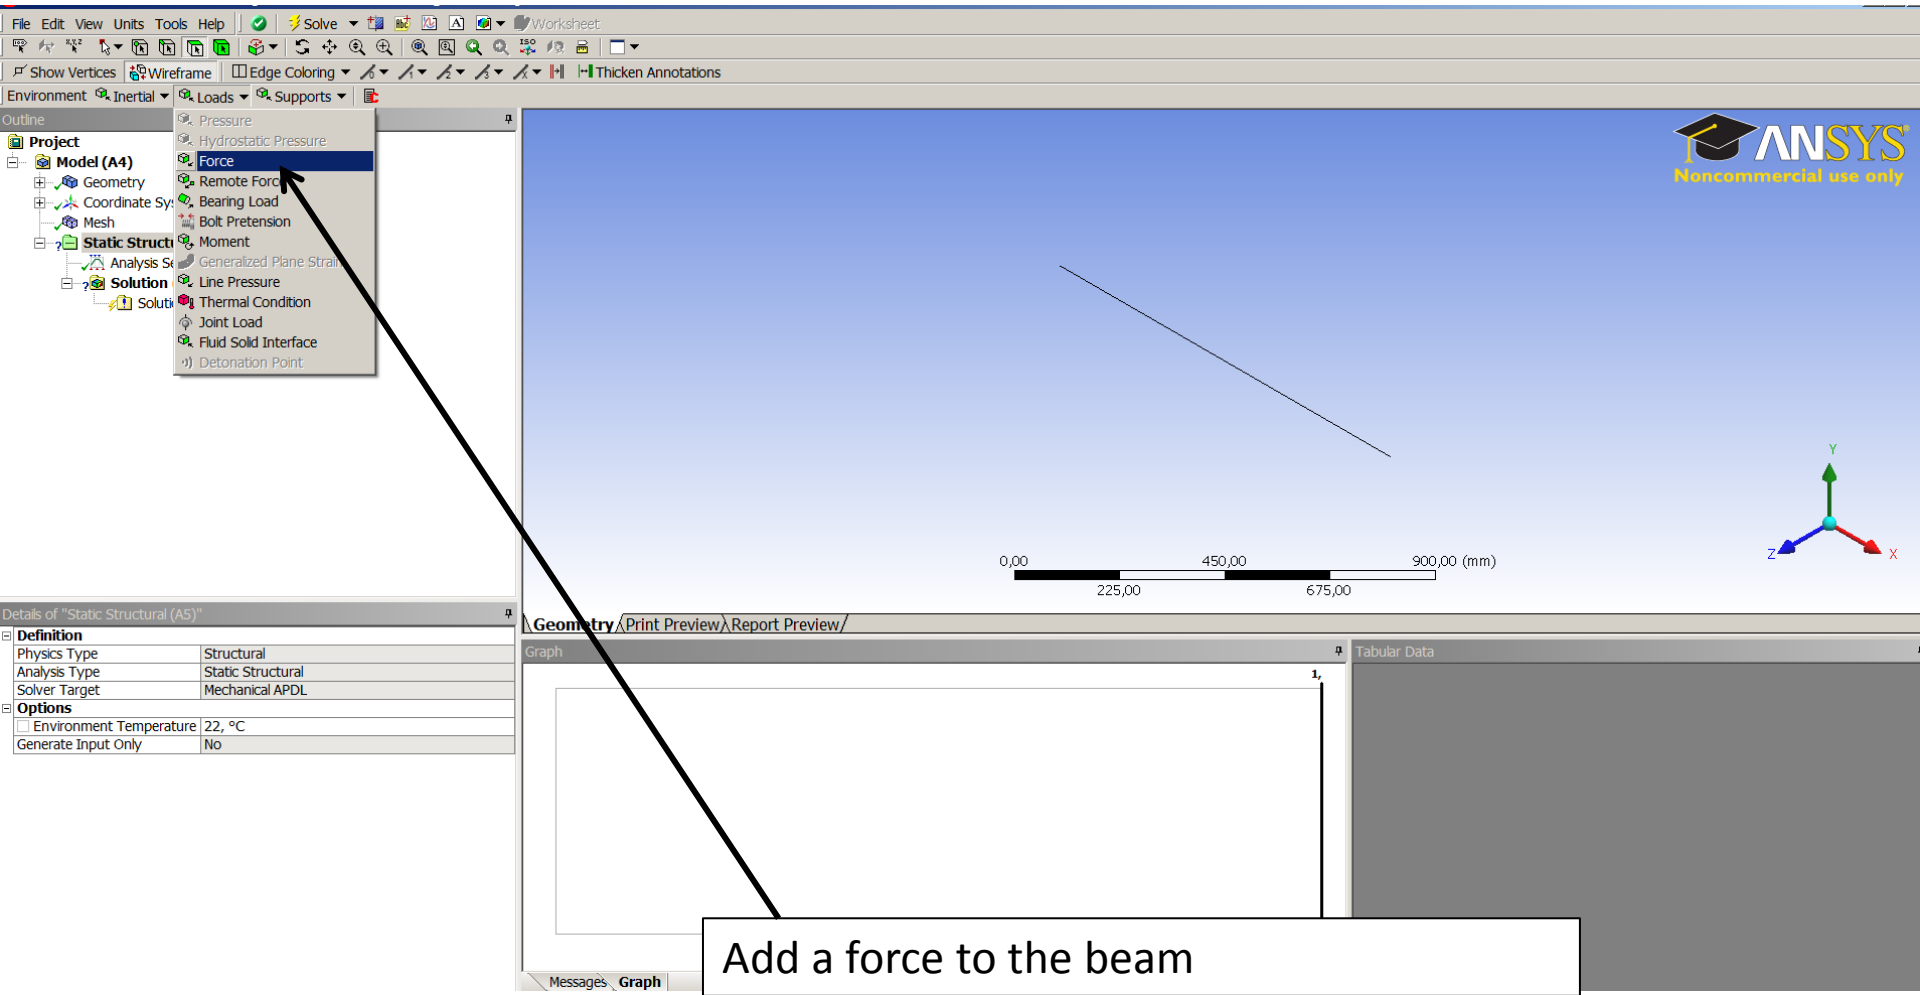

Select Cross Section and edit the dimension of the cross section.

Then add the Cross section to the Beam and you is done
